

## **EmployeeGuard®**

With the **5 Point Business Protection Plan**, you have iron clad protection of your data. Yet, there may be disgruntled employees who may still attempt to damage your business in a variety of ways. With EmployeeGuard®, you'll know about suspicious employee activity *before* it turns into destructive action against your business and your valuable data.

### **EmployeeGuard Monitors:**

- Online searches
- Email sent/received
- Chats
- Web sites visited
- Applications launched
- Keystrokes
- Peer to Peer illegal use

### **Benefits Include:**

- The ability to record all emails, chat, web site visits, and applications launched from any employee.
- Powerful Internet access blocking limiting the ability of employees to visit specific web sites or a category of web sites.
- The ability to block access to specific applications such as AOL Instant Messenger, or a Hotmail account. You can schedule this by day of week and/or by time of week.
- Do you suspect somebody is using your password? In seconds, search through every keystroke typed in a suspicious computer over the last month to find every time your password has been typed by another employee.
- Quickly search through all recorded chats, instant messages, emails, URLs, keystrokes typed. Search by keyword or phrase. Find all chats between two people or

all emails containing profanity or all Internet addresses containing offensive language.

- Stealth technology ensures that EmployeeGuard® is completely hidden from everyone except those with authorized access. It will not appear in the Windows System Tray, Desktop, Task Manager or Add/Remove Programs Menu. It will not be detected by anti-virus or anti-spy software. It is accessed by a series of keystrokes that only authorized users know.
