

**DATA
SECURITY
SOLUTIONS**

Protecting your business 24/7

What Would Happen to You and Your Business, if All Your Data Was Lost, Stolen, or Destroyed?

Protect Your Data Securely Off Site

Our unique off-site backup program stores your data at two remote locations. This means that you are guaranteed your business data remains safe when disaster strikes. Whether it is fire, flood or viruses that compromise your data, you can sleep at night knowing your data is safe and secure.

Benefits Include:

- Secure encryption to prevent unauthorized access to your data.
- Three level access security (account#, password, and encryption key). This is stronger access security than online banking.
- Data Backup at two different locations for optimal redundancy.
- Flexible configurations permitting you to choose the files/folders you wish to backup.
- Built-in scheduler automatically backing up data when you want meaning no user administration, freeing you to focus on your business.
- Ability to backup mapped drives allowing you to backup other computers from a central location.
- Ten file versioning so you can always go back to 10 previous versions of any file you selected for backup, for up to 90 days.
- Escrowed encryption key
- Diesel generator backup
- Data warehouse facility receives semi-annual audits from Price-Waterhouse Coopers for data, storage procedures and methods, and disaster recovery.
- Backup Plans as low as \$25.00 per month.
